EDUCATION

AI Engineer Program
AI Academy Asia · 2026

High School
NEST High School

SKILLS

AI & Data

Python · scikit-learn · Machine Learning · Deep Learning · Computer Vision · YOLO · CNN · OCR · LLMs · Data Analysis

Development

FastAPI · React · Flutter · PostgreSQL · REST APIs · Git & GitHub

Tools & Creative

Label Studio · n8n · Figma · UI/UX Design · Graphic Design

LANGUAGES

Mongolian — Native
English
Chinese

Sanchir Ariunbold

JUNIOR AI ENGINEER

PROFILE

AI engineer trained in Python, machine learning, deep learning and FastAPI through AI Academy Asia's CPD-certified program. My capstone, an oil change predictor using computer vision and ML, is in use at Geo-Expert, where I also do the field work it supports. I enjoy solving real problems from different angles and want to build practical AI products as part of a strong team.

EXPERIENCE

Marketing, IT & Oil Change Technician
Jan 2026 — Present

Geo-Expert LLC · Ulaanbaatar

- Designed and built the Oil Change Predictor, an internal app the team uses at every service to register vehicles and predict the next oil change.
- Create marketing content and social media for lubricants, filtration products and services, turning technical information into clear messaging.
- Apply AI tools and automation to make marketing and customer communication more efficient.
- Perform on-site oil changes for fleet trucks, which shaped the app's design around real field work.

Waiter · English-speaking Receptionist
Summers 2024 — 2025

HS Khan Resort · Five-star resort

- Welcomed and assisted international guests in English at the front desk (2024).
- Delivered five-star dining service during high-volume periods, coordinating with kitchen and service teams (2025).
- Helped with housekeeping and repairs, building teamwork and composure under pressure.

PROJECTS

Oil Change Predictor · AI Engineer capstone · 2026
Plate-photo recognition, customer database and next-service prediction, with Mongolian driver reminders via Viber.
Python · FastAPI · React · PostgreSQL · scikit-learn · YOLO · OCR · Label Studio

Store Demand Forecast · Furniture store · 2026
Dashboard and next-month demand forecast for 336 products, with import suggestions. Built end to end.
Python · FastAPI · scikit-learn

Learn, Detect, Stay Safe · UNESCO Youth Hackathon, team leader · 2026
Gamified app that teaches people to spot scams and fake news across six platforms.
React · JavaScript · Tailwind CSS

Haanein · High school final project, team leader · 2025
App for discovering lesser-known places to hang out; my idea, UI/UX and frontend.
Flutter · Figma

AWARDS & CERTIFICATES

2026 **CPD Certificate — AI Engineer Program** · AI Academy Asia
2026 **UNESCO Youth Hackathon** · Team leader, participation certificate
2025 **Hackateen — 2nd Place** · NEST High School
2025 **Endpoint Security** · Cisco Networking Academy
2024 **72 Hours of Volunteer Work** · Uncage Mongolia
